

Increasing Productivity with Pfiffner The Hydromat® CNC Stand-alone Machining Unit

Your need

- ▶ In the future, you want to manufacture workpieces using your Hydromat® rotary transfer machines that are currently still infeasible.
- ▶ You want to begin contour turning, circular milling or thread chasing.
- ▶ Your Hydromat® rotary transfer machine is supposed to become more flexible and effective.

Your benefits

- ▶ The efficient production of workpieces by reducing the number of work steps and the number of machining stations increases productivity and profitability
- ▶ New possibilities for the machining of even more complex workpieces increases flexibility and competitiveness
- ▶ Quicker and higher quality machining processes with CNC controller increase the precision of workpieces as well as their performance
- ▶ The unit can also be rented

Our solution

- ▶ 1 axis-CNC (Z-axis)
- ▶ 2 axis-CNC (X, Z-axis)
- ▶ 3 axis-CNC (X, Y, Z-axis)
- ▶ Can be retrofitted individually and quickly at any Hydromat® rotary transfer machine.
- ▶ Control cabinet can be variably positioned.
